"Mobility" means a high level of protection:
Runflat systems are the standard in the wheels of specialised protected vehicles.

Europlast-Nycast GmbH has the right emergency running system for all requirements, for wheel sizes from 14 "to 27".

2-parts

3-parts

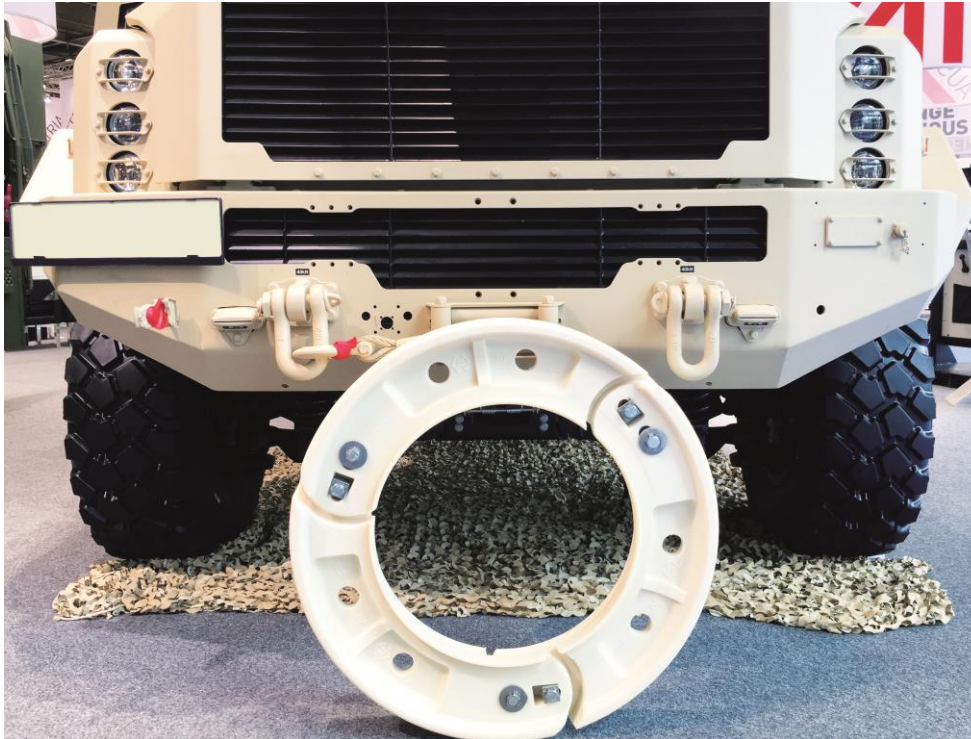

The company Europlast-Nycast GmbH uses a highly resilient, impact-resistant plastic for their emergency running systems.

With the same external dimensions, these systems have smaller volume than other competition products and are therefore lighter.

The Runflat systems from Europlast-Nycast GmbH are particularly characterized by the following advantages:

- High quality standard "Made in Germany" based on certification according to DIN EN ISO 9001: 2015
- Comparatively lighter weight
- High precision and perfectly balanced
- High accuracy of fit to the rim profile
- Stability of shape at -40 to +160° C
- Light use of green lubricants
- Zero ageing
- User friendly system - easy installation and service
- Compatible to CTIS System
- Development and production of the Runflat systems in-house.
- Special solutions and shortest delivery times possible.
